Continuation of 5. does NOT place the application in condition for allowance because: the combination of Pickett and Braden does teach the elements which Applicant has claimed. The combination of Pickett's graphical trace manager and Braden's reservation system would yield projected link utilization schedules over a selected path and predicted bandwidth usage. The argument that Braden does not teach the use of RSVP in a single instance is not considered since such usage would be obvious to one of ordinary skill in the art. Pickett also discloses projecting a selected path and graphically depicting paths, including a plurality of paths through a VOIP network. No Reservation Protocol Session proxy is explicitly claimed by Applicant.
